

Reflection Assignment

Purpose

- To reflect on your experience with the assignments.
 - There are no wrong answers as long as you support your responses using your assignments from D2L.
 - As always, I'm here if you have questions. ❤️

Directions

- Select **ONE** option to reflect on:
 - Using Artificial Intelligence
 - Participating in Socratic Seminar
 - Project-Based Learning

Option 1 - Reflect on Using Artificial Intelligence

1. **Throughout our course, you have had the opportunity to engage with AI chatbots to receive feedback and guidance on your writing assignments. Reflect on the experience you have had in class by answering the following questions:**

- In what ways has interacting with this technology impacted you as a writer and researcher?
 - My experience has been...
- What benefits or limitations have you experienced from using AI to support your work?
 - Some benefits or limitations I have experienced are...
- Discuss one specific example of how the AI chatbot provided insights that strengthen your ability to overcome obstacles.
 - One example using a chatbot that strengthened my ability to overcome an obstacle is...
- Will you continue to use AI in the future? Why or why not?
 -

- You may structure your answers by including the following:
 - Claim (i.e. My experience with AI has been...),
 - Example (i.e. The reasons my experience has been... because...),
 - Evidence (i.e. For example, I used AI to...),
 - Closing (i.e. Moving forward, I will...).

Option 2 - Reflect on Participating in Socratic Seminar

2. Over the past few weeks, we have engaged in Socratic Seminar discussions as our cumulative exams for each unit. Reflect on the experience you have had in class by answering the following questions:

- How has regularly participating in seminars impacted you as a thinker or as a communicator?
 - I have changed from the socratic seminars by...lowering my public speaking anxiety. It has helped me listen and understand why people have differences and how to respectfully disagree with other opinions.
- What new insights, perspectives, or understanding about your peers, society, or the topics have you gained through these discussions?
 - Some new insights I have gained are... the effects on children who grow up in a “untraditional” household, and topics discussing religion. It has helped me notice that my peers have other interests on topics, and what different sides they see that I don't. Different perceptions.
- Discuss one specific example of how your point of view on a controversial issue shifted or became more informed because of the seminar dialogue.
 - One example of my perspective being changed by the Socratic Seminar was... the most recent, the debate on dating apps. I learned some of the security and privacy actions they take and that made me like dating apps whereas before I hated them.
- How can you apply the skills you gained in Socratic Seminar in the future?

- In the future, I plan to... **look at both sides and do extensive research. I plan to use a ChatBot to help me research and back my claims.**
- You may structure your answer by including the following:
 1. Claim (i.e. One significant skill or discovery I made was...),
 2. Evidence (i.e. I have gained...),
 3. Example (i.e. For example, I have learned...),
 4. Closing (i.e. Moving forward, I will...).

Option 3 - Reflect on Project-Based Learning

3. We have engaged in several project-based learning assignments, such as the Ignite presentation, podcast, and video essay. Reflect on the experience you have had in class by answering the following questions:

- How did creating projects in different mediums and formats expand or deepen your learning experience?
 - Creating projects has been...
- What unique advantages or challenges did you encounter when presenting your arguments through these diverse multimodal assignments?
 - Some advantages or challenges I encountered were...
- Discuss one specific example of how your perspective or understanding of your topic shifted through translating it into various media.
 - One example of how my perspective changed because of the projects is...
- How can you apply the skills you gained through our projects in the future?
 - You may structure your answer by including the following:
 1. Claim (i.e. One significant skill or discovery I made was...),
 2. Evidence (i.e. I was able to develop this because...),

3. Example (i.e. For example, I have learned...),
4. Closing (i.e. Moving forward, I will...).
